KEY FEATURES

1

SUPERIOR GOLD RECOVERY

Better recovery than conventional machines.
Save approx. 1-2 grams extra gold at each
30 grams recovery by each machine.

2

HIGH SUCTION

Powerful and consistent suction efficiently
captures polishing dust, ensuring
maximum recovery of precious metals.

3

NON-CHOKING FILTRATION SYSTEM

Unique filtration technology prevents filter
clogging and maintains high suction even
after long use.

4

COMFORTABLE WORKING DESIGN

Ergonomic design ensures operator
comfort and reduces fatigue during
long working hours.

5

EASY TO CLEAN AND REPLACE FILTER

Filter can be cleaned or replaced
quickly and easily, minimizing
downtime and maintenance efforts.

6

VARIABLE SPEED CONTROL

Adjustable speed control helps in precise
polishing, reduces over-polishing, prevents
rejections, and is ideal for delicate pieces.

7

LOW VIBRATION & LOW NOISE

Engineered for smooth and quiet operation,
creating a comfortable environment and
increasing work efficiency.

8

HIGH RPM

High performance motor with
3900 RPM for efficient polishing
and superior output.
